Subject: Request: Additional API rate limit increase for Q2

Hi Sarah,

Hope you're doing well. Following our call last Thursday, I wanted to formally request an increase to our API rate limit from the current 100 requests/minute to 500 requests/minute for the period of June 1 to July 31, 2026.

We have an upcoming product launch campaign and expect a significant spike in document processing volume. Our current limit is already being hit during peak hours, causing delays in our automated pipeline.

Specifically we need:

- Rate limit: 500 req/min (from current 100 req/min)
- Duration: June 1 - July 31, 2026 (2 months)
- Scope: Production API key only

We understand there may be additional costs involved and are happy to discuss pricing. Could you please confirm if this is possible and share the next steps?

This is time-sensitive as we need to configure our systems before June 1.

Thanks,

Arjun Menon
